

## David Byrd to Discuss “IP Communications Continues to Evolve” at IP Communications Industry’s Leading Event this September

DALLAS, 07.14.09 — Broadvox ([News - Alert](#)) today announced that David Byrd has accepted an invitation to present a session, titled "IP Communications Continues to Evolve," at TMC’s INTERNET TELEPHONY Conference & EXPO West 2009 ([ITEXPO](#)) on Tuesday, Sept. 1 at 2:45 p.m. at the Los Angeles Convention Center in Los Angeles.

ITEXPO ([News - Alert](#)), celebrating its 10th Anniversary in 2009, is the world’s largest and best-attended IP Communications trade show, drawing an average attendance of 7,000 buyers and sellers of IP Communications products and services. The show in September will be the 19th ITEXPO, and TMC ([News - Alert](#)) projects total attendance to once again exceed 7,000.

“Attending ITEXPO conferences is always an interesting experience for me,” said David Byrd, Broadvox VP of Marketing and Sales. “IP Communications is unique in that the economic climate has actually infused this industry with opportunities for growth and increasing marketshare. Although I am pleased to share my views on its evolution, I also look forward to attending ITEXPO to broaden my personal range of knowledge about new telecommunications products and solutions.”

“We are very pleased that David Byrd will be participating in this year’s show. Broadvox is widely recognized and respected as an industry leader, and I am confident that our attendees will appreciate and value the opportunity to hear his perspective on IP Communications’ Evolution,” said TMC president and conference chairman, Rich Tehrani. “Over the past twelve months, widespread deployment of IP Communications services by global service providers, businesses and governments has reinforced that this exciting technology is a viable, cost-effective communications solution. As a result, we are seeing a significant number of senior-level executives attending ITEXPO as a means of learning about the technology so they too can take advantage of its benefits.”
