

## E911 Support Now Available for Avaya SIP Phones

911 Enable offers first E911 solution to automatically track Avaya SIP phones

MONTREAL, July 14 /PRNewswire/ -- 911 Enable, a division of Connexon Telecom, today announced its E911 solution for Avaya Communication Manager now includes support for Avaya SIP phones. This is the industry's first and only solution that allows enterprises to deploy SIP phones and receive the same E911 protection as they would using H.323 phones.

911 Enable's support for Avaya SIP phones is made available through its Emergency Gateway (EGW) appliance. The EGW's key features include automatic SIP and H.323 phone tracking, security desk routing and notification, support for teleworkers and non-DID stations, and call recording.

"911 Enable is proud to offer the only E911 solution that supports Avaya SIP phones," said Lev Deich, director of 911 Enable. "This announcement reflects our ongoing commitment to provide E911 support for the latest technology and innovation from Avaya. Enterprises can now deploy their Avaya Communication Managers with confidence that a reliable E911 solution is available for their entire deployment."

911 Enable is a Gold-level member of the Avaya DevConnect Program - an initiative to develop, market and sell innovative third-party products that interoperate with Avaya technology and extend the value of a company's investment in its communications network.
