

Zultys Empowers Voice Solutions through Internet Telephony Service Providers

– Mobilizes your communication through SIP with no gateways & no licenses required!

Sunnyvale, CA, November 16, 2009 – [Zultys Inc.](#), a [leading manufacturer of secure and Enterprise class IP PBX phone equipment](#) for the [mid and Enterprise market](#), has announced the launch of their Zultys ONE SIP bundles. These bundles provide everything a customer needs to have a full [Unified Communications](#) suite of applications running over [SIP trunks](#). Customers can also leverage this deployment as a means of failover or to obtain numbers from different markets.

SIP, being the leading standard for VoIP Communications, is now the choice of all customers who want high availability, increased productivity and reduced costs. To accelerate and launch this deployment, Zultys is working with multiple premier ITSPs. To that end, Zultys has developed solution packages that include the ability to deploy 60 SIP trunks with each of its [MX250 SIP Packages](#) called: SIP/20, SIP/50, SIP/100, SIP/200, and pre-licensed with all the software and hardware needed to rapidly deploy a pure SIP solution - just add phones!

“Our objective was to enable the activation of SIP connectivity and trunking in a simple, elegant and cost efficient manner,” said Neil Lichtman, Zultys CEO. “Zultys delivers a standard interface to activate the service with multiple ITSP providers in a matter of minutes not hours”. Making communications cost effective, Zultys offers compelling bundled SIP trunk pricing that leverages the 60 free SIP licenses included with every bundle.

All the power of SIP in the elegant simplicity of a single purpose built server with no additional licenses or hardware to purchase: The Zultys difference!

About Zultys

Zultys Inc. founded in 2001 and based in Silicon Valley, manufactures its feature-rich [VoIP Business Phone Systems](#) and Unified Communications applications for Windows, Mac and Linux environments and easily scales to thousands of users. Zultys delivers advanced features that help businesses increase productivity, improve customer service and grow profitability. These features include unified communications, [Inbound Contact Center](#), [IVR](#), [ACD](#), [Mobile UC Client](#), [soft-phone](#), [Find me-Follow me](#), [Presence](#), [Secure Chat](#), [Tele-worker support](#), [Call Recording](#), Fax server, and [Cell Phone Twinning](#). All of this is done in an open SIP standard, energy efficient, single server, all-in-one design that eliminates the need for multiple servers making it simple to deploy, manage and use. We call it the Elegance of Simplicity. For more information visit www.zultys.com.
